6. STAFF REPORTS

- a. Bulk Water Station – B. Payette, CAO

The CAO provided an overview of the written report. It was questioned as to what sort of revenue expectation was anticipated. The CAO answered that as of right now, the District is receiving near daily phone calls for bulk water. At present, staff can accommodate this request but can only fulfill requests for non-potable water and must be present to fulfill the order. The addition of an automated, self-serve system would have the benefits of reducing the drain on staff time, of providing potable water to not just local residents but to those in the area who may experience private well emergencies. In addition, the CAO explained, the exercise of the pump and flushing of the system will help extend the life span of the new LCIP reservoir, all while providing a value added service to the community. The expected revenue may at times prove profitable but this will likely fluctuate. The CAO noted that the driving force of this staff recommendation isn't profit driven but is a considered a valuable service that would benefit both residents and the District due to the anticipated reduction of maintenance requirements of the LCIP system.

Security concerns were discussed. It was also suggested that staff look into the feasibility of a partnership with the TNRD as the facility would also service those outside of the municipal jurisdiction.

Moved by Councillor Lodge

Seconded by Councillor McInnis

That Council direct staff to present a report outlining the potential revenue and cost sharing options for the proposed purchase and installation of a bulk water system to the LCIP water system.

CARRIED

b. CAO Update – B. Payette, CAO

**Submitted for information*

The CAO provided an overview of the written report. The following additions were verbally added:
