

Annual Report – Reclaimed Water Discharge

Statement of Report – Authorization # 107685

District of Barriere - Solar Aquatics Wastewater Reclamation Center (SAWRC)

March 30, 2021

To: Ministry of Environment and Climate Change

Attention: EPO, Travis Kurinka

Please be advised that the District of Barriere's SAWRC wastewater facility did not discharge any reclaimed water during the period of January 1, 2020 to December 31, 2020.

The District of Barriere did not use reclaimed water for irrigation and therefore only discharged effluent to the RIB disposal field, during the above noted timeframe.

No user information or communication materials were required as the District did not discharge reclaimed water for irrigation purposes, during the above noted time frame.

No results are available for any receiving environment monitoring, as the District did not discharge reclaimed water for irrigation, during the above noted timeframe. In turn there will be no projected monitoring dates for the 2021 year.

No non-compliance or corrective actions were taken with respect to the discharge of reclaimed water for irrigation, as the District did not discharge reclaimed water for irrigation, during the above noted timeframe.

Kind Regards,

Ian Crosson

Utilities Manager, District of Barriere
