

**Subject:** RE: Inquiry to erect a Terry Fox memorial cedar archway at the Bandshell Park in memory of Ted Smith Sr

Hello Tasha

Attached please find detailed drawings for the proposed Terry Fox memorial cedar archway along with an overlay picture representation of the preferred location at the SE entrance to Fademar Park. The Timbers would be complete with a metal drip cap and no maintenance "Lifetime" treatment. The structure will be 13' 4" High with re-inforced concrete pier and footings. There will be 10' high clearance with 12'8" between the 8"x8" posts. There is 3' from the top of upper beam to the bottom of the lower beam which makes for a perfect place to hang event banners. There will be no carvings, just a 5"x10" plaque in honour of the late Ted Smith Sr. and his contributions to the Community Terry Fox Run.

Greg Smith and I met with Chris Matthews to measure the area and to determine that there were no sprinkler heads or inground obstacles and as well that 10'H x 12'8"W should not impede any vehicle access.

Gilbert Smith will arrange and pay for the complete construction from fabricating to erecting upon approval and in coordination with the District staff.

We would like to take this proposal to the next Council meeting with a goal of having the Archway complete for the Sept 19<sup>th</sup>, 2021 Community Terry Fox Run.

Thank you!  
Kathy Cooper & Kris Luison
