| Date: January 11, 2021 | File: 530.20/Rpts |
| To: Council | From: I. Crosson, Utilities Manager |
| Re: Siska Wasterwater Treatment Plant UV Replacements | |

Background: The UV filters installed at the Siska Wastewater plant during initial construction failed some time ago and staff have been researching replacement options as the model type installed is past warranty and is now no longer available.

Discussion: Since an identical product isn't available, staff have looked at two options:

1. A retro-fit – The cost of such a retro-fit equals approximately \$6,600 for two units and would not have any guarantee of working.
2. Full Replacement – After receiving multiple quotes, Andrew Sheret Ltd. has provided the best price of \$8,134.42 for both the required units (quote attached)

Recommendation: That two (2) UV replacement units for the Siska Wastewater Plant be purchased for \$8,134.42 plus applicable taxes.
